Education

SRM institute of science and technology

Sept 2022 – 2026

B.tech in Computer Science and Engineering with spl in Artificial Intelligence and Machine Learning

- **GPA: 8.05**

Experience

Student Volunteer

June 2024 – july 2024

Lions Club NGO (Eye Hospital)

- **Hospital Support:** Assisted in maintaining cleanliness and hygiene, ensuring a safe environment for 50+ patients monthly.

AIML Intern

may 2026 – present

CDAC(Centre for Development of Advanced Computing)

- Developed and integrated 1 Model Context Protocol (MCP) server while working with 5+ machine learning models, AI frameworks, and Agentic AI concepts to build and optimize intelligent applications.

Publications

Real estate prediction using ML algorithms

April 2025

Subalakshmi.S, **Sreekavin A.R**, Anshika Singh, Jagabattula Saahitha

Projects

Predictive Analytics in Cardiovascular Disease

January 2024 – May 2024

- Built ML models (e.g., logistic regression, random forest) to predict cardiovascular disease risk, achieving an accuracy of 85% on a dataset of 10,000+ patient records.
- Preprocessed data by handling missing values and feature engineering, improving model accuracy by 12% and reducing noise in a dataset of 50+ clinical attributes.
- Optimized model evaluation using cross-validation across 5 folds, reducing variance in performance metrics by 10% and ensuring robust generalization.

Predictive Analysis for Real Estate Price Forecasting and Trends

January 2025 – May 2025

- Built a real estate price forecasting model on 10,000+ property records, achieving an RMSE of 2.3 lakhs using Random Forest and XGBoost.
- Enhanced prediction accuracy by 18% over baseline regression, enabling reliable 3-year trend forecasting for housing markets.
- Conducted feature engineering on 25+ location and property attributes, improving model interpretability and reducing error rate by 12%.

Technologies

Languages: Python, C++, C.

Framework: TensorFlow, LangGraph, LangChain, PydanticAI, OpenAI Agents SDK

Libraries: Pandas, Numpy, Matplotlib, Scikit-learn, Seaborn .

Developer Tools: UV ,VS Code,Cursor,Jupyter Notebook, Google Colab

Cloud Platforms: Google Cloud Platform (GCP)
